Australian Poly Specialists

Australian Poly Specialists (APS) specialises in the fabrication of high density polyethylene (PE100) pipework, custom made fittings, including standard fittings from our well-stocked warehouse and is able to work with its clients offering flexibility.

APS fittings are manufactured and accredited to AS/NZS 4129:2008.

Using the latest technology and equipment, APS large manufacturing capacity reduces lead times to ensure projects are delivered on time.

APS staff has many years' experience in the construction and manufacturing industry which enables them to work with clients and find solutions.

Our services include:

- Experience working with isometric drawings
- Fabrication of polyethylene pipe spools from 20mm to 1200mm
- Manufacture of equal and reducing tees up to 1000mm

- Manufacture of segmented bends up to 1200mm
- Manufacture of end fittings - up to 1200mm
- Fabrication of polyethylene sheet work
- Fabrication of tanks

APS stock a large range of HDPE (PE100) pressure pipe fittings to service the mining, industrial, civil, plumbing and irrigation industries. Just some of the range includes pipe, stub flanges, backing rings, sweep bends, tees and moulded fittings.

APS also stock a comprehensive range of electrofusion fittings, including machines which can be hired for both short and long term.

APS quality management system is accredited to AS/NZS ISO 9001:2008. Inspection procedures ensure pipe, fittings and spooling is dimensionally accurate and complies with customer drawings and specifications.

As a quality endorsed company, APS prides itself on setting high standards within its fabrication and manufacturing facility. This is proven by our strong growth and satisfied clients.
